“Russia and BRICS countries in the Cultural Dimension: the New Art of the New World” is a special exhibition project organized on the initiative of the Embassy of the Russian Federation to the Italian Republic together with the BRICS diplomatic corps in Rome on the eve of the XVI BRICS Summit in Kazan (22-24 October 2024). The collection features works by contemporary artists from Brazil, Russia, India, China, South Africa, Egypt, Ethiopia, Iran and UAE.

Strengthening cultural and humanitarian ties is one of the key priorities of BRICS partnership cooperation, alongside with politics and security, economy and finance. Each of the ten BRICS countries is unique in its cultural heritage, centuries-old traditions and customs. BRICS countries' cooperation in the field of culture fosters understanding between states and nations, strengthens the global space of equality, justice, mutual respect, peace and friendship. We are all united by a common vision of the role of culture and cultural cooperation in the new multipolar world, which should serve as a universal instrument of dialogue between countries and peoples, and not as a tool of politics.
